

Esoteroglyph

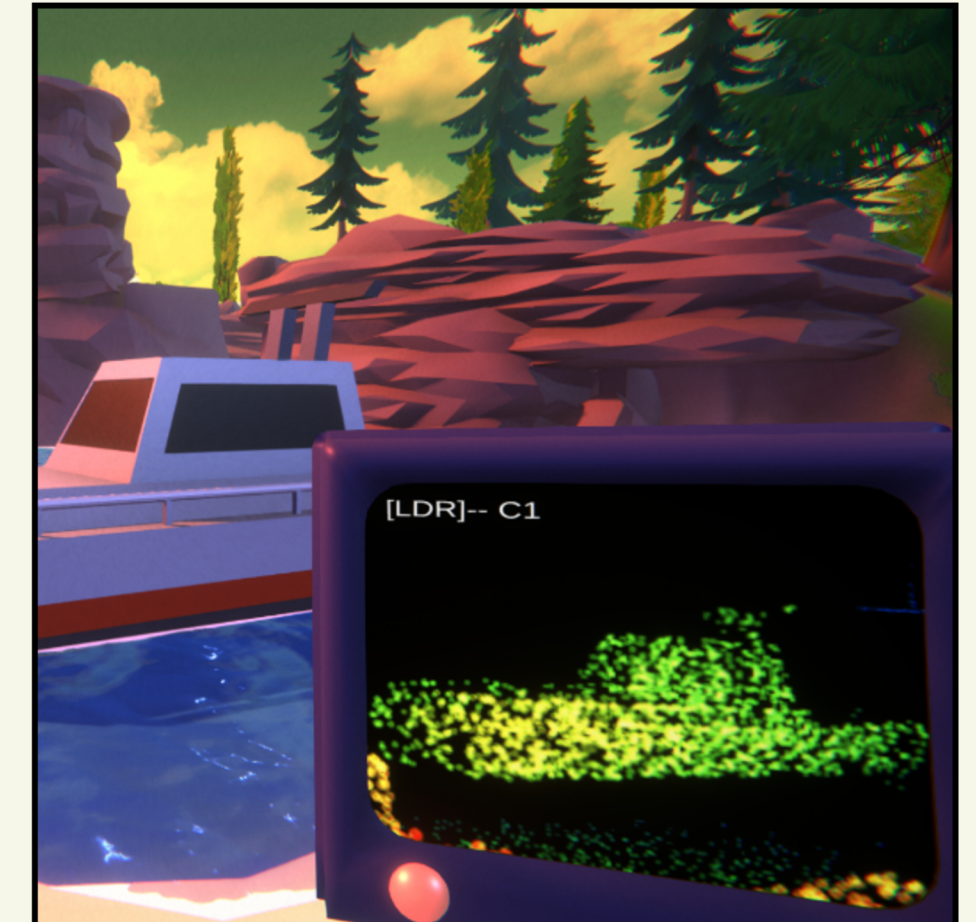

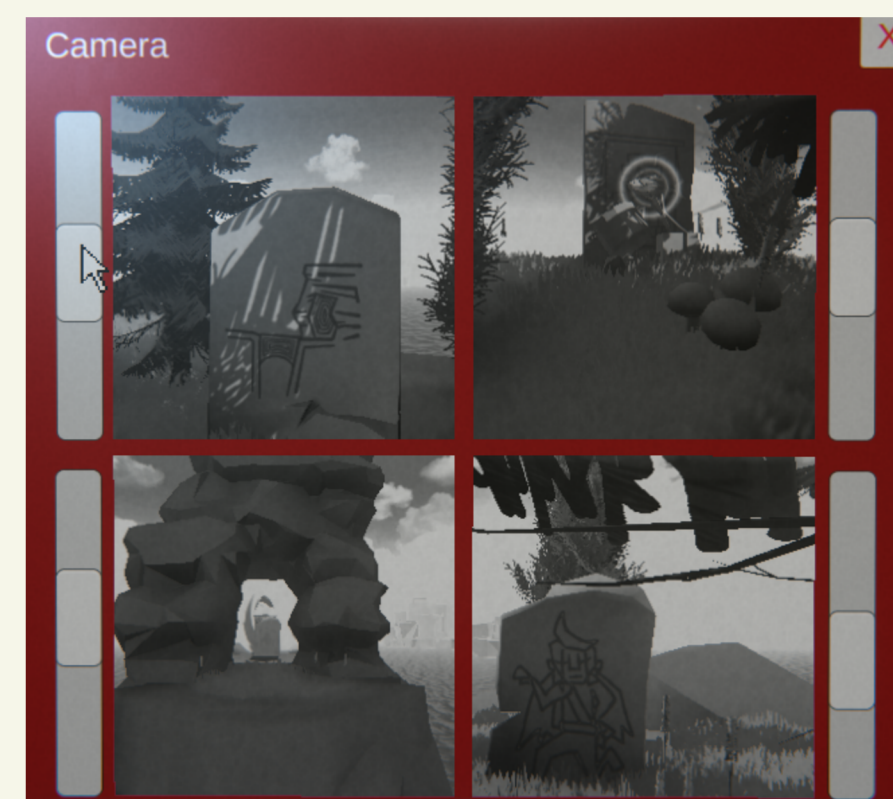

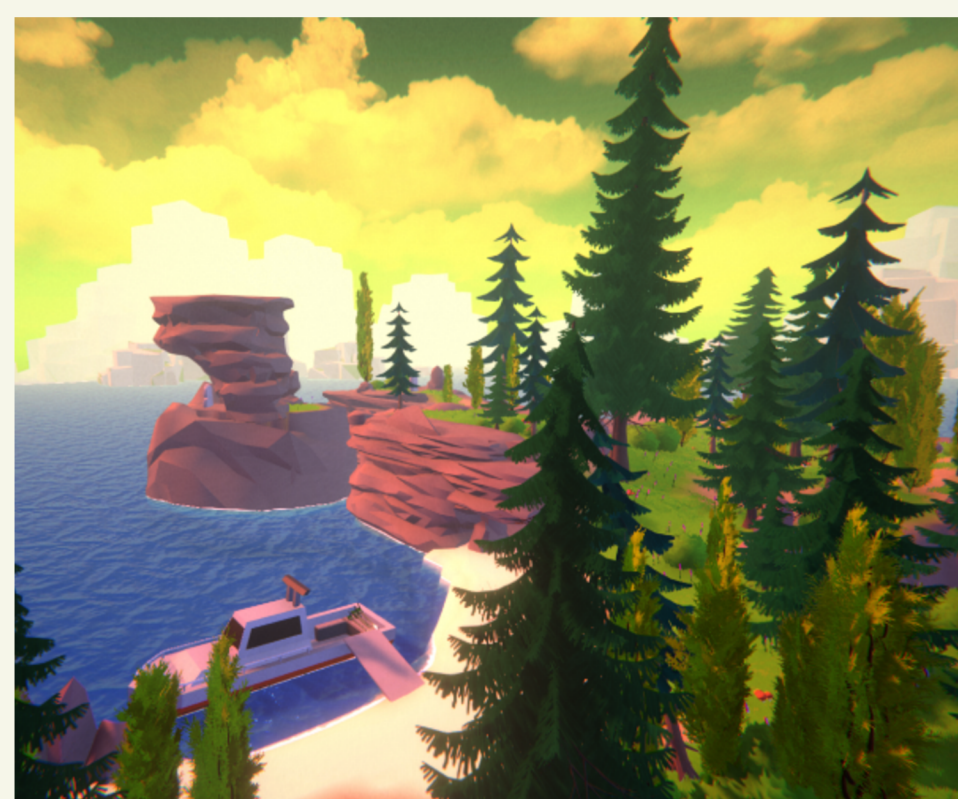

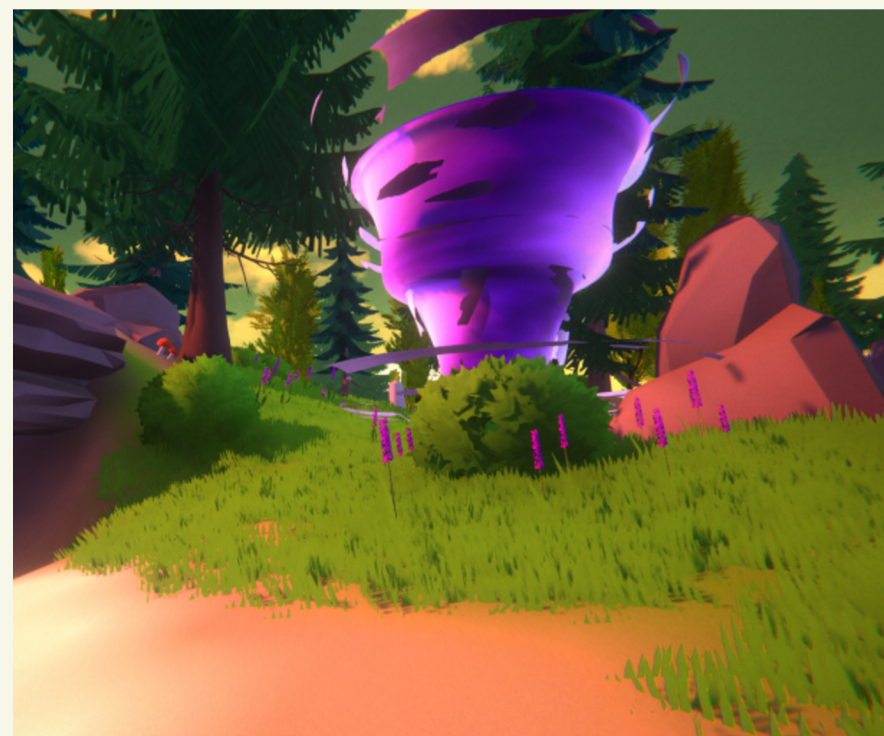

Jake Rohrlach Cade Swanson Will Bruce

"As a well-travelled archaeologist, you've probably seen your fair share of puzzling sites, but you're sure you've never seen something like this before. Ruins come to life on a mysterious island in the Mediterranean Sea, and it's your job to catalogue the effects and abilities of the logic-defying glyph stones scattered across the island's surface."

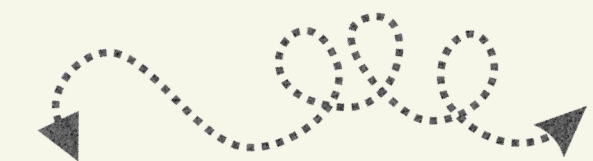

Game Loop:

- Explore your surroundings and journal Glyphs.
- Return to the PC, found inside your boat, to view Glyph descriptions.
- Set sail to save your progress.
- Return to journal additional Glyphs you may not have seen before.

Esoteroglyph is a walking simulator, with puzzle, mystery and some horror elements.

Return to the island again, and again to discover all possible Glyphs.

Utilize your research equipment to document Glyphs.

- Cameras
- Personal Computer
- ESOBox
